

BRAND GUIDELINES / VERSION 1.0

Evidence at conversation speed.

A complete identity for a calm, transparent live-verification layer.

AUGUST 2026 / PRODUCT + LANDING / V1.0

The brand at a glance.

CATEGORY	Live verification
ESSENCE	Constructive skepticism
ROLE	The calm layer between a claim and a decision
PROMISE	Sourced context while the moment still matters
TAGLINE	Evidence at conversation speed.
PURPOSE	Make scrutiny a natural part of conversation.

MISSION

Make scrutiny a natural, constructive part of conversation.

PERSONALITY

POSITIONING STATEMENT

For people who conduct consequential conversations, Obelus is the live verification layer that turns spoken claims into sourced context while the conversation is still happening.

UNLIKE

Transcripts, search tabs, and post-call checks

OBELUS KEEPS

Evidence inside the conversation, fast enough to use now and transparent enough to trust later

Start where the next question matters.

01	Journalists, interviewers, hosts	Ask the next question while it still matters.
02	Researchers, analysts, diligence teams	Turn every conversation into a sourced research session.
03	Decision-makers	Do not let an unchecked claim become a decision.
04	Accuracy-accountable institutions	Make the record easier to trust.
05	Curious individuals	Do not just hear it. Check it.

Five pillars. One visible process.

01

Evidence over verdicts

Sources stay prominent. Black-box scores do not.

02

Fast, never reckless

Early findings remain visibly provisional.

03

Question claims, not people

Examine statements without assigning motive.

04

Make complexity legible

Finding first. Qualification second. Trail third.

05

Trust made visible

Consent, provenance, freshness, and corrections in view.

An ancient reason to look closer.

Long before the obelus became a division sign, ancient editors used a horizontal mark in the margin to flag a line as doubtful or possibly spurious.

ACCURACY NOTE

Say doubtful, disputed, or requiring scrutiny. Do not say the ancient Greeks used the modern division symbol to mark false text.

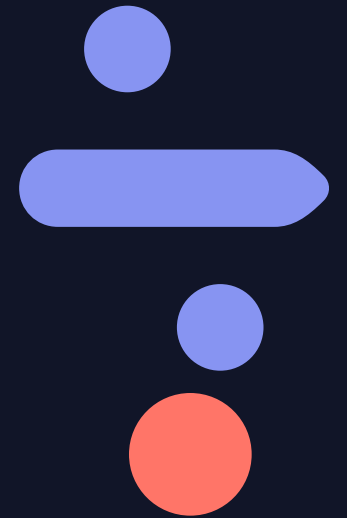

The familiar dotted division symbol is a later form associated with the same name. Obelus brings the act of examination into live conversation.

RECOMMENDED SHORT STORY

Obelus takes its name from an ancient editorial mark: a short horizontal stroke placed beside text whose authenticity was in question.

The familiar division symbol is a later form associated with the same name. For us, it means one simple thing: look closer.

Not a verdict. A reason to look closer.

The message builds in layers.

01	CATEGORY	Live verification for spoken conversations
02	PROPOSITION	Evidence at conversation speed.
03	EXPLANATION	Obelus follows the live transcript, identifies checkable claims, and surfaces reliable sources while the conversation is happening.
04	TRUST PROOF	Every finding shows its sources, date, status, and uncertainty.
05	ACTION	See Obelus live

MASTER TAGLINE

Evidence at conversation speed.

EXPRESSIVE

See what stands up.

PURPOSE

Keep the conversation
honest.

PHILOSOPHY

Every claim deserves
context.

CATEGORY

Live verification for spoken
conversations.

Clear. Calibrated. Curious.

01	Plainspoken intelligence	Informed without sounding professorial.
02	Calibrated certainty	Say what is known and what remains uncertain.
03	Constructive curiosity	Invite a closer look without accusation.
04	Conversation-speed clarity	Lead with the finding, then reveal depth.
05	Warm composure	Personality without snark or alarm.

Name the state, not the person.

REWRITE

Instead of “False. The speaker is wrong,” write: “This claim conflicts with the latest published data.”

The Dialogue Axis.

Recognizable as an obelus. Distinct through offset dialogue geometry, a soft editorial stroke, the title-case wordmark, color, and motion.

A claim placed under examination.

TWO VOICES / TWO CHECKS

Offset dots create a sense of exchange and independent scrutiny.

THE CLAIM LINE

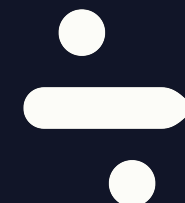

The statement being examined, not a person being judged.

EDITORIAL DIRECTION

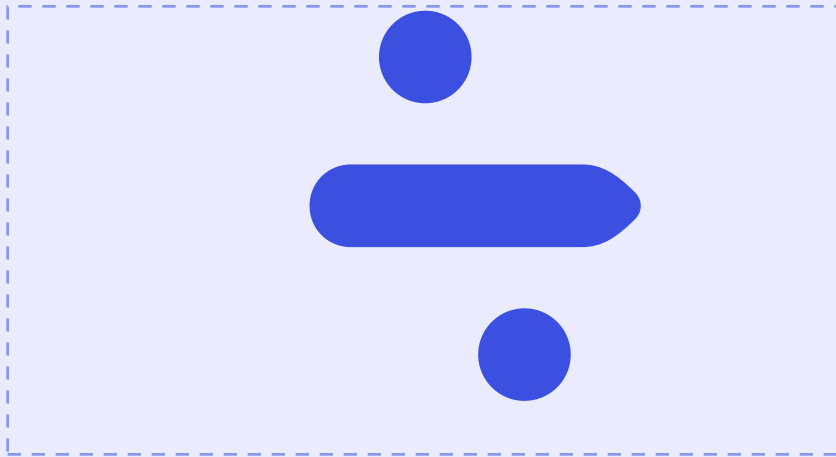

A soft terminal suggests inquiry moving toward context.

One family. Four everyday configurations.

Give the mark room to be read.

MINIMUM CLEARSPACE: 1.5 DOT DIAMETERS

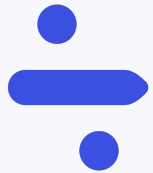

MINIMUM SIZES

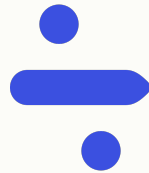

Use the fully rounded micro bar below 20 px. The horizontal lockup should not appear below 96 px digital or 25 mm print.

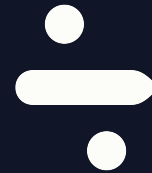

Flat color. Controlled contrast.

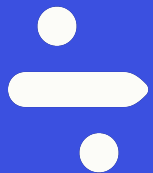

Evidence Blue on Paper

Evidence Blue on Cloud

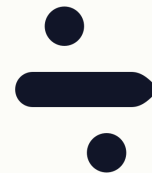

Cloud on Ink

Cloud on Blue

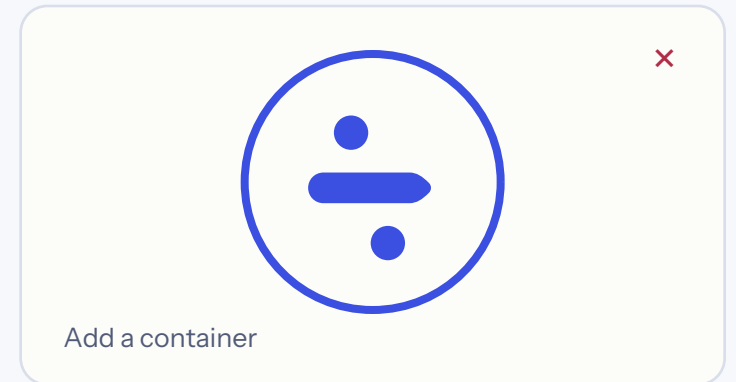

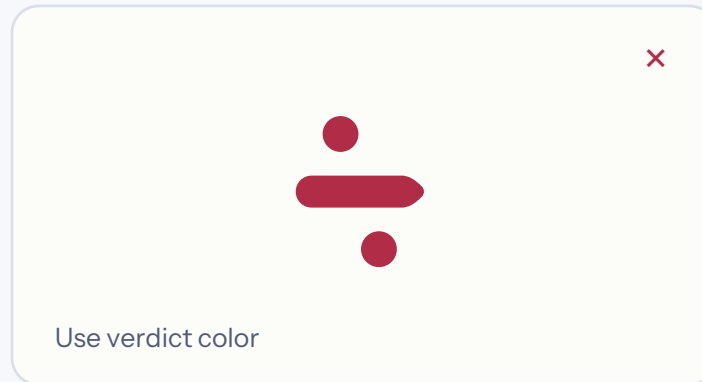

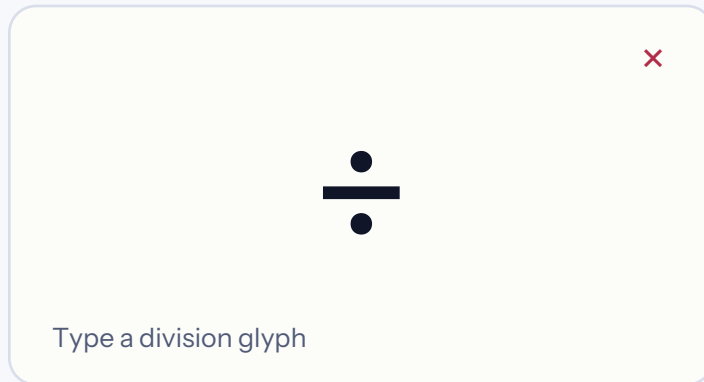

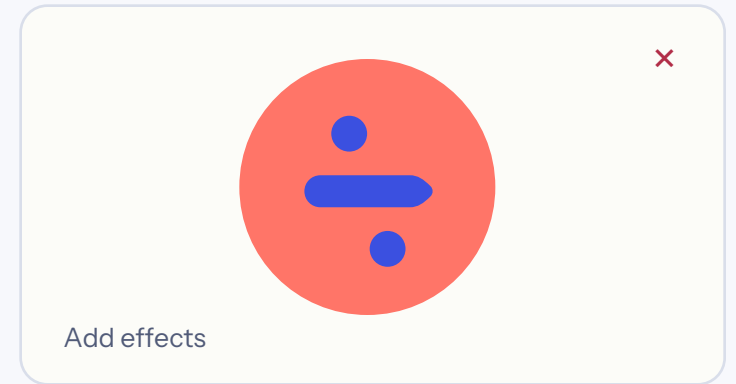

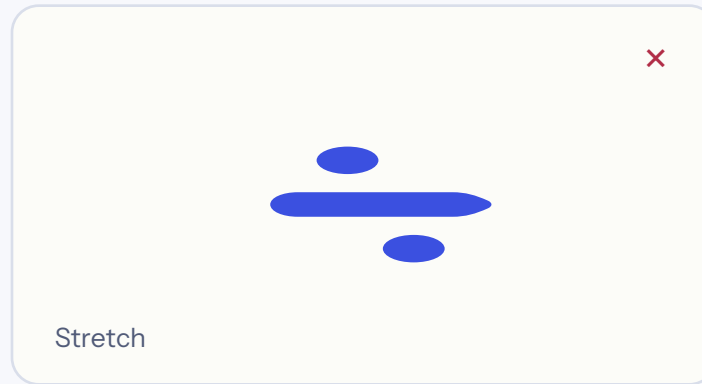

Live Aqua on Ink

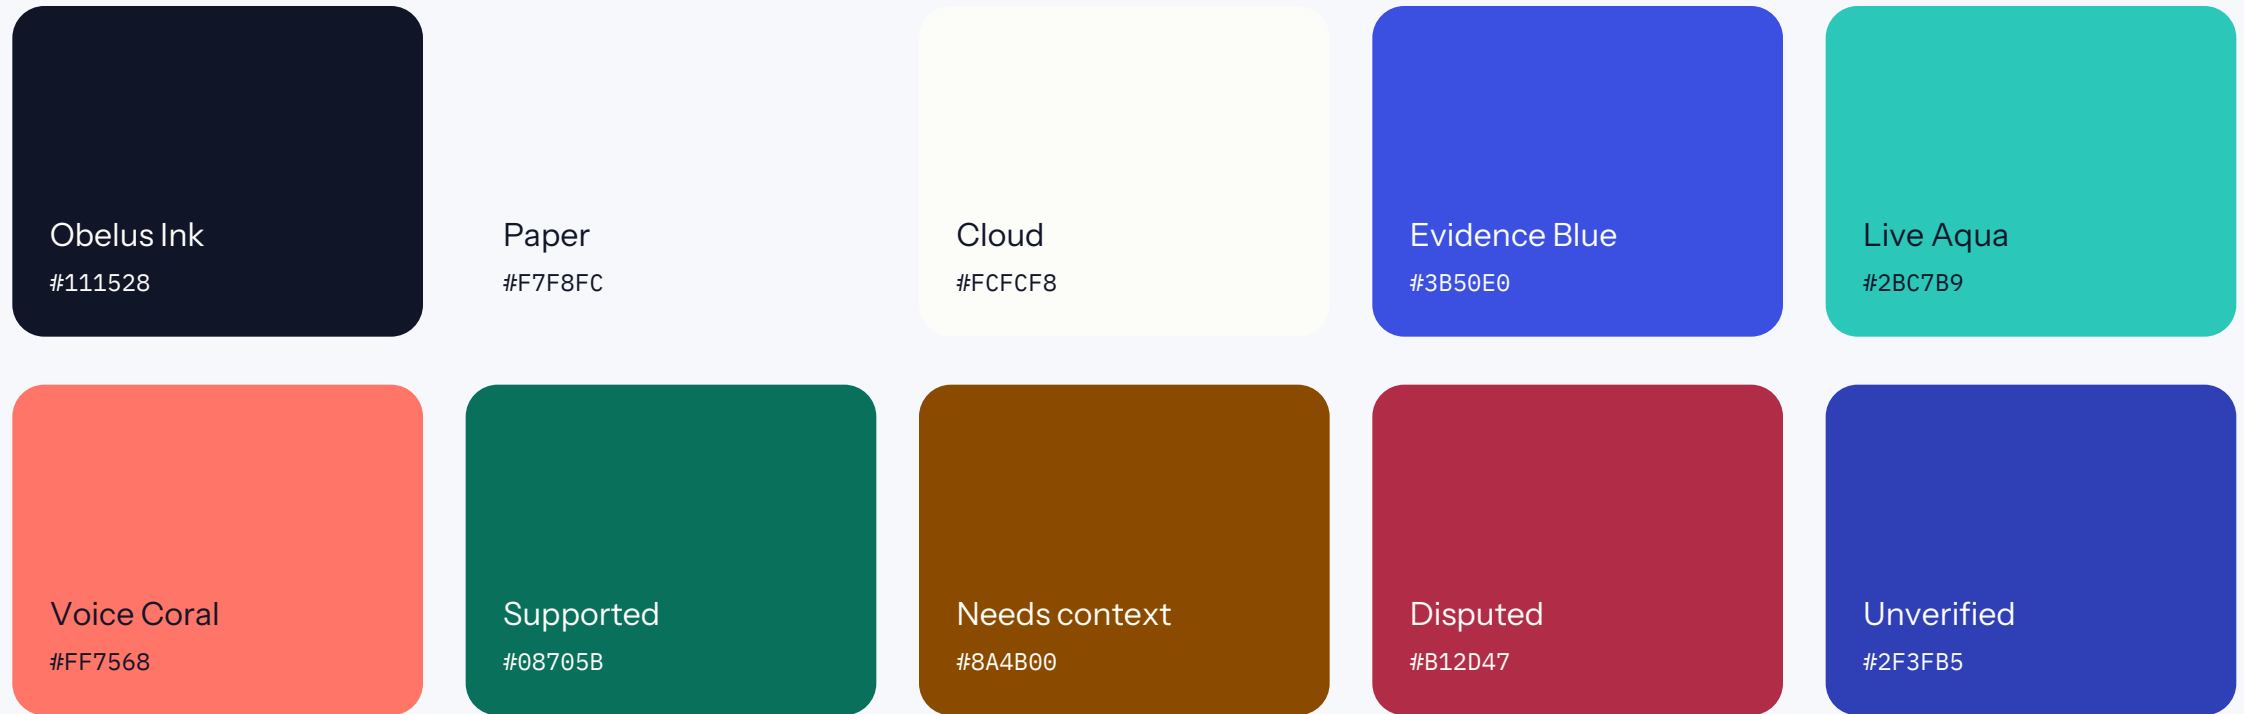

Ink monochrome

Do not dilute the mark.

Evidence Cobalt, with a human pulse.

Color supports meaning. It never carries it alone.

Supported

Published evidence aligns with the claim.

Disputed

Reliable evidence conflicts with the claim.

Needs context

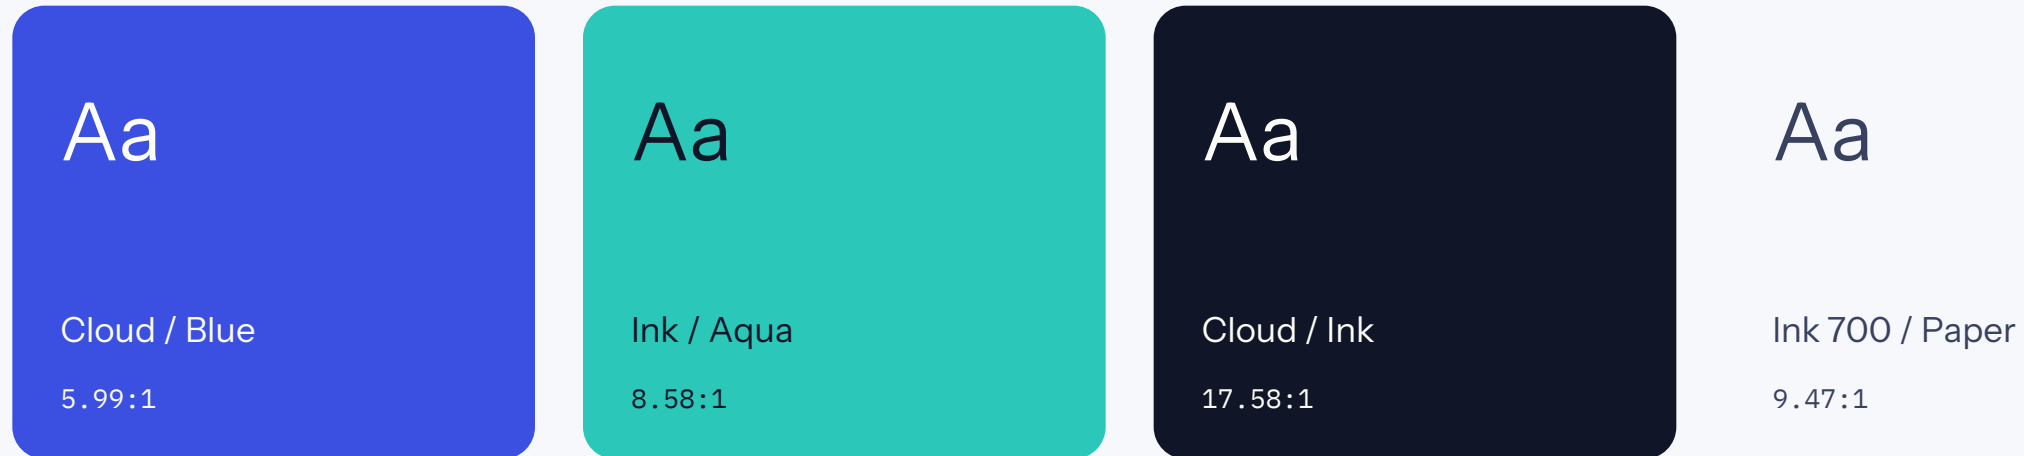

A qualification changes how the claim should be understood.

Unverified

No reliable result has been established yet.

Every state appears with a written label, a distinct icon, and an evidence trail or next step. Never convert a loading state into red or green.

Contrast is engineered, not assumed.

- Body text targets WCAG AA at 4.5:1 or better.
- UI boundaries and icons target at least 3:1.
- Status is always icon + label + color.
- Dark mode uses lighter surfaces for depth, not heavy shadows.

Precise, with a small pulse of playfulness.

Instrument Sans

A variable neo-grotesque with precision and a small pulse of playfulness.

Question claims. Not people.

CHECKING

Icons confirm a written label. They do not replace it. Use a 1.8 px stroke on a 24 px grid and retain round joins and caps.

Motion that looks closer.

01

Precise, not robotic

Geometric movement with clean deceleration.

02

Calm scrutiny

Inspect, align, and resolve without alarm.

03

Recognition first

Preserve a base mark or complete-mark hold.

04

Interruptible

Results can replace a loader immediately.

05

Never a verdict

Loading stays neutral and source-oriented.

06

Accessible

Static reduced-motion states and polite text status.

LOADER 01 / 1200 MS

Proof Pulse

BEST FOR

Default compact checking

RECOMMENDED SIZE

16-24 px

Upper dot, claim line, and lower dot resolve in sequence.

Reduced motion: static canonical mark with a concise textual status.

LOADER 02 / 1350 MS

Transcript Scan

BEST FOR

Active transcript analysis

RECOMMENDED SIZE

20–32 px

A narrow inspection band travels across a faint complete mark.

Reduced motion: static canonical mark with a concise textual status.

LOADER 03 / 1600 MS

Source Exchange

BEST FOR

Multi-source research

RECOMMENDED SIZE

24 px and larger

The source dots exchange positions around a stable statement line.

Reduced motion: static canonical mark with a concise textual status.

LOADER 04 / 1840 MS

Obelus Resolve

BEST FOR

Signature handoff

RECOMMENDED SIZE

40-96 px

The editorial stroke appears first; evidence points settle around it.

Reduced motion: static canonical mark with a concise textual status.

Progress Divide

BEST FOR

Known progress only

RECOMMENDED SIZE

20–48 px

Top dot, measurable line fill, and completion dot. Never a truth meter.

Reduced motion: static canonical mark with a concise textual status.

Evidence stays adjacent to the claim.

The screenshot displays the Obelus interface, which is divided into two main panels. The left panel, titled "Community impact interview", shows a live transcript of a conversation between Jordan Miles (JM) and Avery Kim (AK). The transcript is organized by time, with each entry showing the speaker's initials and a timestamp. The right panel, titled "Finding", displays a specific finding related to the transcript. The finding is titled "Participation increased, but 'nearly doubled' depends on the baseline." and includes a brief description of the finding, a timestamp, and a list of sources. The interface also includes a sidebar on the left with navigation icons and a top bar with controls like "Listening", "Export", and "Pause listening".

3 participants · Recording consented

Live transcript | All speech | Claims only | 18:42:21 · LIVE

18:40:52 JM Jordan Miles
Let's start with the scope. How many locations were included in the rollout?

18:41:04 AK Avery Kim
We moved from twelve permanent sites to twenty, with another four temporary sites operating through June.

18:41:31 JM Jordan Miles
And what changed for the people using them?

18:41:47 AK Avery Kim
The latest numbers show participation nearly doubled in a single year.
Needs context · 6 sources

18:42:06 JM Jordan Miles
Does that comparison include the four pilots, or only permanent locations?

18:42:15 AK Avery Kim
It includes the pilots. Also, the current grant cycle closes on October 31.

18:42:21 JM Jordan Miles
One report says average travel time fell after the expansion. Is that measured consistently?

Listening for checkable claims...

Finding

"Participation nearly doubled in a single year."
Needs context

Participation increased, but "nearly doubled" depends on the baseline.

The county report shows a 71% year-over-year increase across permanent sites. Including temporary pilot locations raises the comparison to 92%. The claim is directionally supported but needs the comparison set made explicit.

► How Obelus reached this finding

Was this finding useful? ↑ ↓

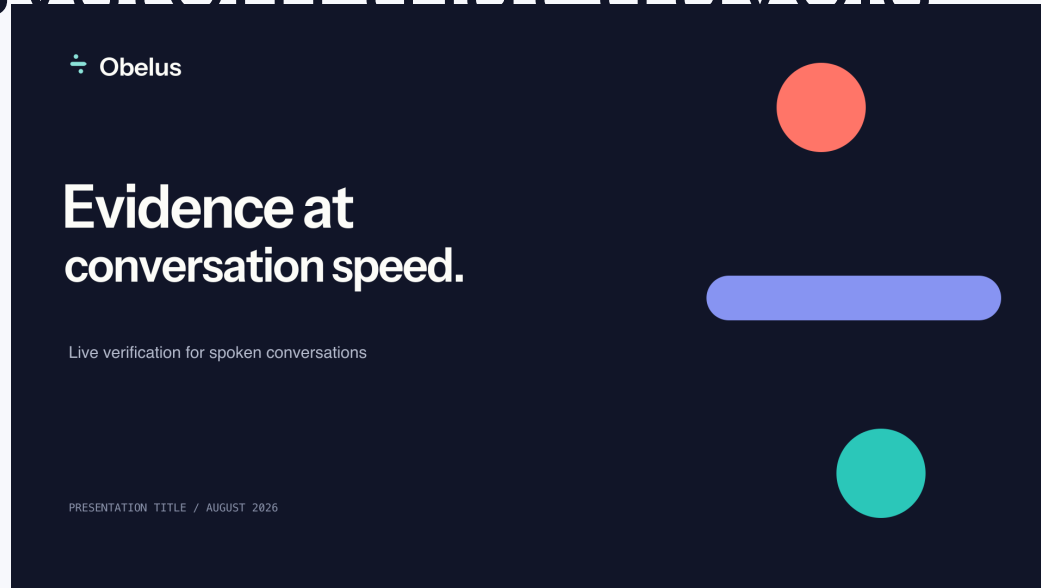

Transcript first. Active claim second. Finding, qualification, freshness, and source trail in one visible relationship.

Let the product prove the proposition.

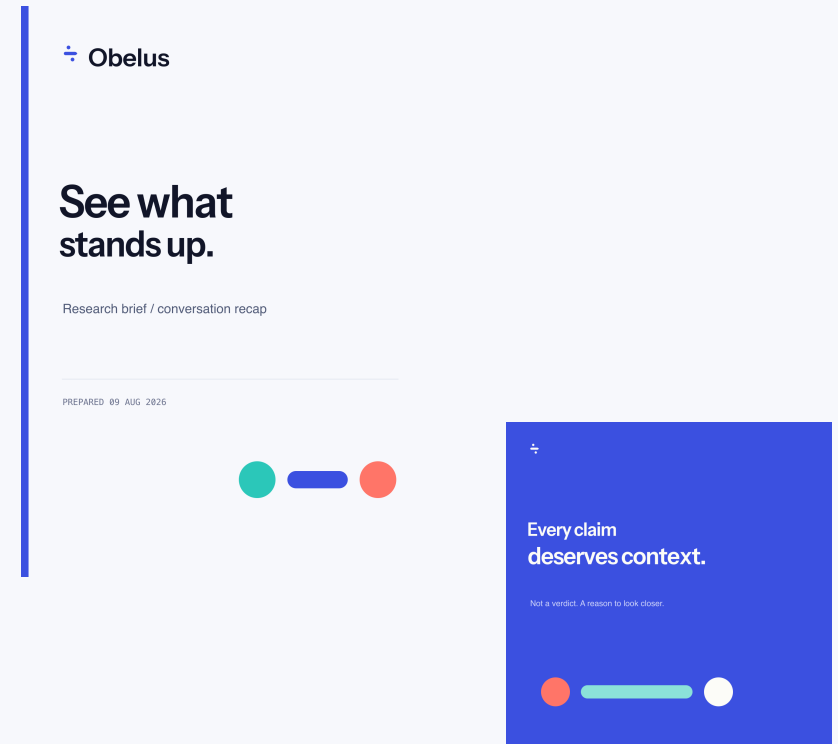

A plain category, a memorable benefit, and real product UI. Personality lives in the Dialogue Axis, color, editorial margin, and motion.

A system that travels

INCLUDED TEMPLATES

Presentation cover · Research brief cover · Social avatar · Open Graph card · Social quote · Email signature · App icons

Everything needed to build.

IDENTITY

- SVG and PDF masters
- PNG size ladders
- App icons and favicons
- Eight concept explorations

SYSTEM

- Open-source fonts
- CSS and JSON tokens
- Tailwind preset
- Contrast matrix
- Status icon family

MOTION + UI

- 5 SVG loaders
- 5 Lottie files
- GIF, MP4, WebM previews
- React reference
- Product and landing HTML

The package manifest and checksums identify every delivered file. Source scripts reproduce generated assets.

Design-ready. Name clearance pending.

MATERIAL NAMING COLLISION RISK

Existing software and technology businesses use Obelus, including a paper-review product with closely related semantics. Commission professional word-mark, device-mark, domain, handle, app-store, and relevant class clearance before launch.
